

# CX-530/840

## COAXIAL CEILING SPEAKER

Suitable for both background and sound reinforcement, the CX Series is a compact two way speakers that are ideal for installation where clear and high quality sound is necessary. Despite their portable size, the CX-530 and CX-840 offer surprisingly high frequencies coverage and extended bass response, thanks to their ported and tuned enclosure. Driving the true performance of CX Series is its tweeter, which is designed to work with a high quality long paper cone, and its woofer that is reinforced by a Mylar vibrating membrane. The back enclosure of both CX-530 and CX-840 is fitted with a rotating tabs mounting system and each unit is finished with white ABS panels.

### Technical Specifications

| Model              | CX-530            | CX-840         |
|--------------------|-------------------|----------------|
| Rated Power        | 30W               | 40W            |
| Frequency Response | 80-20kHz          | 50Hz-18kHz     |
| Cone Type          | Coaxial           | Coaxial        |
| SPL (1W, 1M) dB    | 88 ± 3dB          | 88 ± 3dB       |
| Impedance          | 8Ω                | 8Ω             |
| Tapping Power      | 30/15/7.5/3.8W/8Ω | 40/20/10/5W/8Ω |
| Line Input         | 100V              | 70V/100V       |
| Mounting Hole      | ∅ 200mm           | ∅ 240mm        |
| Dimension (DxH)    | ∅ 230 X 150mm     | ∅ 270 x 170mm  |

### Physical

| Material & Finish | ABS; White                   | ABS; White                   |
|-------------------|------------------------------|------------------------------|
| Grille            | Powder Coated Aluminium Mesh | Powder Coated Aluminium Mesh |
| Speaker           | 5" + 1"                      | 8" + 1"                      |
| Weight            | 2kg                          | 3kg                          |
