

# SW-Series

## SUBWOOFER UNIT

SW-18

SW-218

The Flepcher SW-Series Subwoofer Unit can offer a highly-efficient acoustic enhancement that provides the needed edge to lift your sound reproduction system to the next level. As a needed enhancement to your pro-sound system, the SW Series works to improve the low-frequency response, stretching the system's response to as low as 35Hz. Powerful and constructed with acoustically superior material, this series puts forward two models namely: the SW-18 and SW-218 that offers endless possibilities to your acoustic system.

### Product Features

- Constructed with high quality low-frequency driver, and sports a 100 mm voice coil
- An enclosure made of 18 mm plywood provides extra durability and sound performance for this unit
- Equipped with protection circuit that safely protected the frequency driver against excess power
- This unit is shielded from physical damage, thanks to its 18 gauge perforated, steel grill
