

NX Series

Professional Loudspeaker

The NX professional loudspeaker series offers great versatility being able to respond to a high range of frequency. The NX professional loudspeaker series is a reliable series being designed for heavy-duty performances. It is built to withstand high power during operation, delivering punches without compromising on the quality and endurance. Suitable for installation in places such as school hall, meeting room, event or seminar premise, entertainment outlet and other premises that require powerful music quality.

Features

- Equipped with good quality compression driver (Ferro fluid cooled) and titanium diaphragm that improve high-frequency performance as well as system reliability
- High voltage capacitors and inductors with massive core and heavy gauge wire
- Enclosure is constructed from 18mm plywood for extreme durability and improved low-frequency performance
- Protection for high-frequency driver from excess power is available, without a compromise on the sound quality
